Flight Information

The accuracy and currency of information contained in this guide is uncertain due to the difficulty in obtaining the information and the rapidly changing environment. Aviators should always check with a country's aviation authority or a local aviation handler to determine any specific aircraft airworthiness/equipment and crew/passenger entry requirements.

Airports of Entry (AOE)

Austria has 51 AOE's. Refer to Austria AIP AD 1.3 for a complete listing with restrictions. Salzburg, Linz, Innsbruck, Graz, and Klagenfurt are the only IFR airports, are facilitated airports and require slot times (General Aviation – VFR flights are not required to have slot times). Contact the Schedule Coordinator Austria for slot times.

SCA – Schedule Coordination Austria GmbH
Office Park I, Top B08/04

1300 Wien-Flughafen
Austria

Tel: 43 (0)1 7007 / 23600
Fax: 43 (0)1 7007 / 23615
Email: (For slot times): viecpvh@slots-austria.com
Email: (Others): info@slots-austria.com
Website: www.slots-austria.com

Entry/Exit Requirements

Entry and exit requirements are for aircraft departing the United States non-stop to country of destination. These requirements do not include any technical stops. Please refer to **Technical Stop** section in **Additional Information** for the country at which the technical stop will be made.

When entering/departing from Austria the pilot in command has to report at least one hour before entering the Austrian territory and one hour before departing respectively.

Entry Requirements (Departing the U.S.)

- File an [eAPIS](#) manifest outbound (recommend inbound at this time, too)
- File and activate international flight plan
- Land at a designated airport of entry (AOE) – customs and immigration

The following entry documents are required:

Passengers –

- Valid passport
- [Visa](#) for some countries (not required for USA)
Austria is a party to the Schengen Agreement. As such, U.S. citizens may enter Austria for up to 90 days for tourist or business purposes without a visa. The passport used should be valid at least for the period of the intended stay (usually the date of the return flight).

Pilots – Same as passengers

Note: Other pilot/crewmember requirements may be applicable in lieu of those stated. Contact appropriate AIS for further clarification prior to flight.

Aircraft – The IFIM Staff is not aware of any aircraft required documents for entering Austria. Contact the AIS for more information.

Exit Requirements (Departing Austria)

- Depart from an AOE
- File [eAPIS](#) manifest if inbound to the U.S.
- File an international flight plan
- Call U.S. Customs at filed U.S. airport of entry

Additional Flight Information

Aircraft Instruments and Equipment

U.S. aircraft airworthiness and certification requirements may not meet other countries requirements. It is the responsibility of the pilot to determine if the aircraft meets those requirements.

The items listed below are for pilots' reference to determine if the aircraft meets minimum instrument and equipment requirements of the destination country. Additional equipment may be required to comply with the airspace navigation requirements.

Aircraft of foreign nationality conducting flights within Austrian airspace shall comply with the provisions of ICAO Annex 6 and 8 as amended however:

- Night VFR and IFR flights must have a Mode A with 4096 codes and Mode C with automatic pressure altitude reporting.
- ELT
- RNP 5 when operating above FL 195
- 8.33 KHz channel spacing radio equipment when operating throughout the ICO EUR Region
- DME when conducting IFR flight

RVSM

[Domestic and International RVSM](#) guidance is provided on the IFIM Home Page. Click on the **Air Traffic** tab and select **Separation Standards** from the drop down list.

Technical Stop / Overflight

Aircraft with a maximum certificated takeoff mass of more than 5700 kg are exempt from the ELT equipment requirement when overflying Austria.

Non-scheduled Flights (Charters)

The IFIM staff is not aware of any regulations or requirements regarding non-scheduled flights. Contact Austria AIS for more information.

Private Flights

General aviation VFR flights, unless superseded by NOTAM are not required to coordinate slot times but must still file an ICAO flight plan.

Float Planes

The IFIM Staff is not aware of any Float Plane requirements or restriction.

Light Sport Aircraft

The IFIM Staff is not aware of any Light Sport Aircraft requirements or restrictions.

Fees

Users should anticipate varying fees for landing, parking, passenger service, noise, security and Infrastructure charges at the aerodrome (Contact appropriate airport authority for more detailed information). There may also be Terminal (covering the costs

incurred for the use of services and facilities of Terminal Air Navigation Services) and Enroute (Austria applies the EUROCONTROL system for the establishment and collection of charges for enroute air navigation facilitates and services) Charges.

Fuel

Jet A1 and Avgas are available at most airports in Austria. Contact appropriate airport authority for more detailed information.

<http://www.ead.eurocontrol.int>

Night VFR

Night VFR flights shall be planned and executed so that along their route terrain clearance is guaranteed and that they remain within controlled airspace.

Aeronautical Charts

Charts are available from the Austrian AIP and from:
